

N-PACT Compilation 2019

Norwegian Particle, Astroparticle
and Cosmology Theory community

Introduction

N-PACT is a network aimed at all researchers at Norwegian academic institutions (and Norwegians at CERN) working on Theoretical Particle physics, Astroparticle physics, or Cosmology. The founding workshop was 19.-22. June 2017 at the University of Stavanger, the second 28.-31. May 2018 also at UiS. The third workshop was held at the University of Oslo 5.-6. August 2019. The fourth will be at the University of Agder in June 2020. The network compiles an annual summary of the combined scientific activity of the network members (this document), and runs an annual workshop and an email list: **npact@uis.no**.

N-PACT now appears as the official entity for PACT in the Norwegian contribution to the European Particle Physics Strategy Document (*Research Plans of the Norwegian Particle, Astroparticle and Nuclear Physics Communities till 2025*). It is stated:

For Norwegian theory, activities at and in connection with CERN play a major role, but rather than focusing on a specific experiment, the theory community takes a broader view and combines its interest in not only particle physics but also astrophysics and cosmology in the N-PACT theory collaboration. It is important that these theory activities be given an enhanced visibility in the European Strategy Update.

And in the section devoted to theory research activities, it says:

The Norwegian community in particle, astroparticle, and cosmology theory (NPACT) is coalescing and is represented here in a single section. A new networking activity has been initiated, connecting all six institutions where theory activities currently exist. As the result of a recent generational turnover, the majority of the network members are newly appointed staff at the six institutions and are of relatively young age (< 50 y). The network is working towards net growth, as well as increasing Norway's participation in CERN theory activities and the Norwegian quota there. To be successful, we see a need for funding opportunities for theory activities distinct from experiments, mirroring the role played by the Theoretical Physics Division at CERN.

This is then followed by a description of the specific PACT research activities.

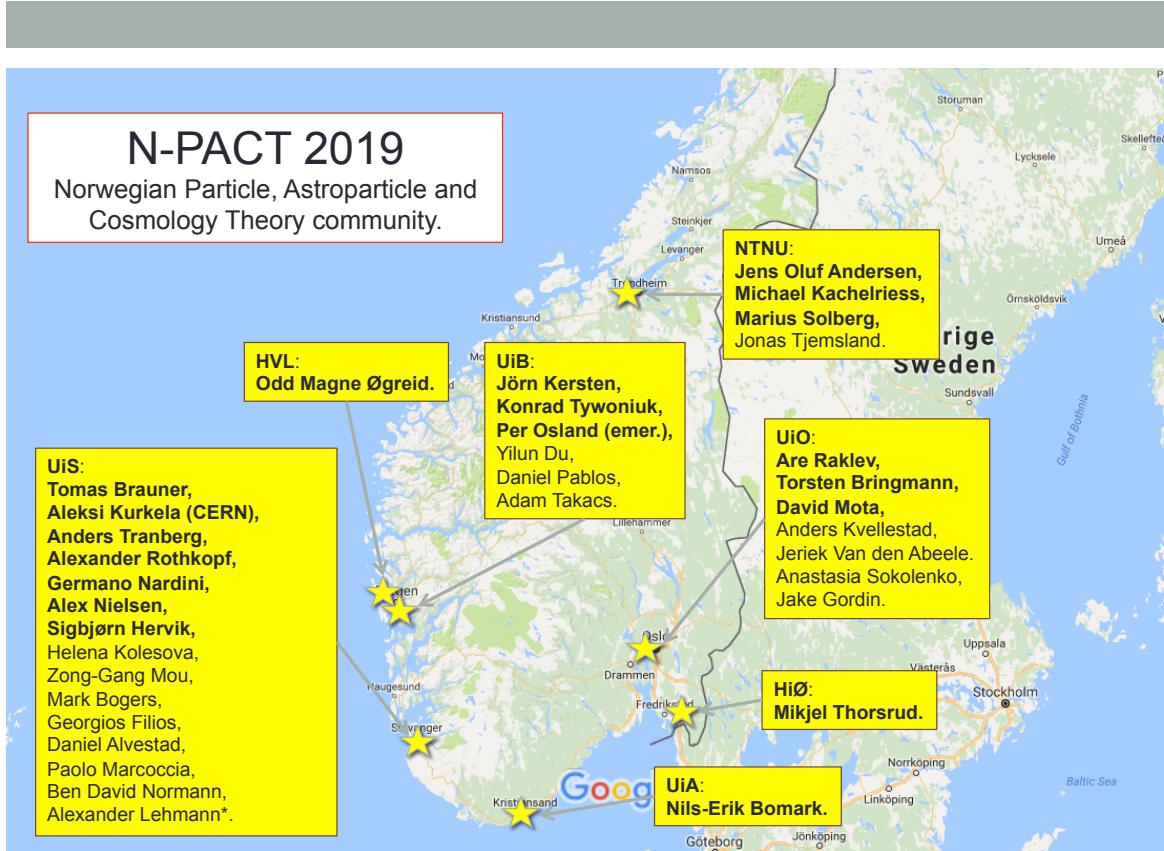

Figure 1: Network members and their affiliations in Norway

Member profiles

University of Agder

Nils-Erik Bomark,
Associate Professor.

At UiA since 2015. SUSY phenomenology, NMSSM, Dark Matter.
How to teach particle physics non-technically.

University of Bergen

Jörn Kersten,
Professor.

At UiB since 2014. SUSY phenomenology, self-interacting dark matter, physics of the early universe, cosmology, neutrino physics.

Per Osland,
Professor (emer.).

At UiB since 1987. Particle phenomenology, Extended Higgs sector, CP violation, Dark Matter.

Konrad Tywoniuk,
Researcher (Group Leader).

At UiB since 2018. Heavy-ion physics, hard probes (jet quenching, heavy bosons), finite temperature theory, cosmology.

Yilun Du,
Postdoc.

At UiB since 2019. Heavy-ion physics, jet quenching.

Daniel Pablos,
Postdoc.

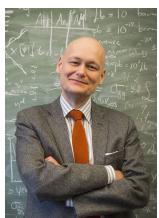

At UiB since 2019. Heavy-ion physics, jet quenching.

Adam Takacs,
Ph.D. student

At UiB since 2019. Heavy-ion physics, jet quenching.

University of Oslo

Are Raklev,
Professor.

At UiO since 2010. Particle Phenomenology, SUSY, Dark Matter. LHC, CERN, GAMBIT.

Torsten Bringmann,
Professor.

At UiO since 2013. BSM particle physics and cosmology. Astrophysical probes of dark matter: indirect detection and structure formation. Dark-SUSY, GAMBIT, CTA.

David Mota,
Professor.

At UiO since 2011. General Relativity, Cosmology.

Anders Kvellestad,
Postdoc.

At UiO/Imperial College since 2017. BSM global fits, LHC phenomenology, supersymmetry, two-Higgs-doublet models, machine learning and Bayesian methods. GAMBIT.

Jake Gordin,
Ph.D. student

At UiO since 2018. High energy astrophysics.

Anastasia Sokolenko,
Ph.D. student.

At UiO since 2016.

Jeriek Van den Abeele,
Ph.D. student.

At UiO. Astroparticle physics, Dark Matter.

University of Stavanger

Anders Tranberg,
Professor.

At UiS since 2013. Finite temperature and out-of-equilibrium field theory, cosmology, baryogenesis, inflation and gravitational waves. CERN, LISA.

Tomas Brauner,
Professor.

At UiS since 2015. Finite-temperature and -density field theory, phase diagram of QCD, effective field theory, spontaneous symmetry breaking.

Sigbjørn Hervik,
Professor.

At UiS since 2009. GR, Modified Gravity, Differential Geometry.

Alex Nielsen,
Associate Professor (emer.).

At UiS since 2019. Gravitational waves, General Relativity, Black holes

Aleksi Kurkela,
Associate Professor.

At UiS/CERN since 2014. Heavy-ion collisions, QCD at finite temperature, density. Compact stars. LHC, CERN.

Germano Nardini,
Associate Professor.

At UiS since 2018. Cosmological phase transitions, gravitational waves, beyond Standard Model physics.

Alexander Rothkopf,
Associate Professor.

At UiS since 2018. Lattice QCD, numerical field theory, out-of-equilibrium field theory.

Helena Kolesova,
Postdoc.

At UiS since 2018. Finite-temperature field theory, symmetry breaking.

Georgios Filios,
Ph.D. student.

At UiS since 2018. Effective Field Theory, phases of QCD.

Zong-Gang Mou,
Postdoc.

At UiS 2016-2019. Out-of-equilibrium field theory, baryogenesis.

Mark Bogers,
Ph.D. student.

At UiS since 2015. Symmetry breaking in quantum field theory.

Daniel Alvestad,
Ph.D. student.

At UiS since 2019. Lattice field theory, Monte Carlo simulations.

Ben David Normann,
Ph.D. student.

At UiS since 2015. Anisotropic cosmological models.

Paolo Marcoccia,
Ph.D. student.

At UiS since 2019. Gravitational waves.

Alexander Lehmann,
Ph.D. student.

At UiS since 2018. Lattice field theory and Hadron physics.

NTNU, Trondheim

Jens Oluf Andersen,
Professor.

At NTNU since 2005. QCD at finite temperature and density: Quark-gluon plasma, finite-density QCD and quark matter, phase transitions.

Marius Solberg,
Associate Professor.

At NTNU since 2016. Works on N-Higgs doublet models, quantum field theory, particle phenomenology.

Michael Kachelriess,
Professor.

At NTNU since 2005. High energy astrophysics, dark matter, neutrino physics.

Jonas Tjemsland,
Ph.D. student.

At NTNU since 2019. High energy astrophysics, cosmic antimatter.

HVL, Vestlandet

**Odd Magne Øgreid,
Associate Professor.**

At HVL since 1999. Works on particle phenomenology, extended Higgs sector, CP-violation.

HiØ, Østlandet

**Mikjel Thorsrud,
Associate Professor.**

At HiØ since 2014. General relativity, cosmology.

Combined publication list

Metrics:

- 74 peer reviewed journal publications, published during 2019.
- 79 publication points, using new formula,

$$\sum \left[\sqrt{\frac{\text{Authors/affiliations in NPACT}}{\text{All authors/affiliations}}} \times \text{If International} \times \text{Publication level score} \right]$$

where: *If International* is 1 if all authors are Norwegian, 1.3 otherwise; *Publication level score* is either 1 or 3, depending on the journal; *Authors/affiliations* count author/affiliation combinations (a single author with two affiliations counts twice); and where *All authors/affiliations* for a single publication is capped at 10 (for instance for GAMBIT).
